

Secure - User/Group Management Software

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Secure is a standalone user/group management system written in PHP that provides a customizable interface for user logins, user data and various other user associated functionality. Secure is the perfect tool for websites wishing to provide secure private user areas. Furthermore, Secure is powered by FORMfields and is therefore easily integrated with any FORMfields project.
