SecureCRT combines rock-solid terminal emulation with the strong encryption, broad authentication options, and data integrity of the Secure Shell protocol. SecureCRT offers a tabbed interface, advanced session management and customization, built-in scripting, X.509 certificate authentication, a FIPS 140-2 validated cryptographic library, and extensive emulations including VT100, VT102, VT220, ANSI, SCO ANSI, Wyse 50/60, Xterm, and Linux console.
