Sekure JavaScript

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Using an Anti-Leech method, this script allows you to protect as many .js files as you wish. The protected .js files can only work on the URL you specify. And if someone tried to download your protected .js file, they will only get an error script. Perfect for WebSites that like ultimate security. Works best with Pragma No-Cache.
