

Select Menu Builder Class

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A server-side VBScript class for creating drop-down menus from a database, a file, manually or a combo of any of the three. You can apply inline styles, CSS classes, pre-selected options, script events, change the menu size, make it multiple select, disable it and more. Many examples included.
