

# Send email via ASP 3.0 and CDONTS

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script shows how to send an email via the CDONTS objects available to ASP 3.0. It will take a selection of form input, create the required e-mail objects, send the e-mail to the specified recipient and then redirect the user to a confirmation page, thanking them for their input.
