

Sending Mail To The Mail List

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

In this tutorial, you will learn to create the admin send mail form. It shows you how to use a loop to send the mail instead of simply separating the cc email addresses by commas. It also allows you to choose to send to everyone on the list, or send to only one specific recipient on the list.
