

Session Saver

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This package can be used to save and restore objects in session variables. It can register a list of one or more classes objects that are intended to be saved. The classes must implement the SessionObject interface. The class can call all the registered classes to save and restore the state of the session objects.
