ShareTream TreeviewHTC is a web component which helps to include foldout treeview menus in your web page. Treeview uses Microsoft HTC behavior technology. This helps use the power of thin web client (i.e. IE browser) and at the same time makes the process of treeview construction very simple. You doesn't need to know JavaScript language or something else. Treeview are represented as plain html style text. Try this small, fast and simple treeview menu in your web applications.
