

ShellCommander

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Can't get a shell account at your ISP? Want to be able to use normal Unix commands to maintain or clean up your directories, create backups, install software and debug scripts? Execute multiple commands at one time. Easy to install, set up and use. Multiple security features include password protection, valid referer URL list, hidden directories, configurable file names.
