Shipping and payments are critical aspects for any online business that can make or break it. Many times, eCommerce store owners need to block out some shipping or payment method for a particular group of customers. But default Magento 2 install does not provide such a functionality. Thus, managing the shipping and payment method's availability for different customer groups becomes hard. This could affect adversely your online sales growth and revenue generation. Magento 2 Shipping and Payment Method per Customer Group Extension from Mconnect Media allows store admins to control what shipping and payment method to show at checkout for particular customers. The extension can show/hide only those shipping and payment method assigned by the store admin from the backend. It has an easy to manage backend grid to assign particular shipping and payment methods for a particular group. The assigned shipping and payment method must be pre-enabled to function at the checkout. The extension is easy to activate and configure. Features of Mconnect Magento 2 Shipping and Payment Method per Customer Group: •The extension is helpful to enhance the checkout experience of your customers. •Show/hide any particular shipping/payment method for a customer group. •Easy to manage backend grid to assign shipping and payment method. •Customers can use only assigned shipping and payment method during checkout. •It helps to personalize the shopping experience of customers belonging to a particular group. •Also, it can improve the user experience as well as sales and revenue for Magento 2 stores.
