

Shopping Assistant for Magento

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Help your customers to quickly find the right product with the smart Shopping Assistant extension! Customers don't always have a clear understanding of what they would like to buy. When the product is too complicated, or when the choice is insufficient or too big, customers may spend all the time they had for shopping without actually making up their minds and making the purchase. Shopping Assistant is a smart way to guide your customers through the shopping process. It can be set up to provide a set of questions to customers and provide them with the best choice options based on their answers. Shopping Assistant is quite flexible: it allows customers to skip questions and doesn't require the full completion of the questionnaire to provide relevant product choices. This extension makes sure the customer finds the right product. It significantly speeds up the search process and makes it more fun. Full list of features is available on the product page
