Online booking software suitable for airport shuttle operators and private transfer companies. Embed an easy shuttle booking software to your website to let customers get an instant quotes and reserve a suitable transport service. You can add predefined transfers with multiple drop-offs, set up shuttle prices, manage workflow and client enquiries. The shuttle booking software can be custom configured to your business. You can add different services by managing fleet inventory, set up transfer rates, date & time format, currency and create your own booking rules. Built-in language module allows you to translate both the front-end and the back-end to any language you want, as well as to add a multi-language support on the front-end. With a single purchased copy you can use the shuttle reservation software on an unlimited number of websites. The setup is really easy and quick.
