

Simple Database Input and Display

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Inputting data into an Access or SQL server database is very easy in .asp. This script will take input for two text fields (First and Last name) and write them to an Access db. A second script will allow you to view all of the inputs into the Access to date.
