

Simple easy ASP.NET CAPTCHA Tutorial

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

I will show you how to create a ASP.NET Captcha control without using any HTTP HANDLERS or what so ever. you can easily plug it into your web pages. All you need to do is Create a ASPX page, that ASPX page will have a content type of image/jpeg, then within the code-behind file of that asp page we will be using system.drawing namespace to create a dynamic image.
