Mobile Number	{value_mobile_number}
Email	{value_email}

Simple File Manager (SFM) is a web based file management utility. It is designed to be used by those that don't want to or SHOULD NOT use ftp. It can be dropped into a specific directory and give access to that directory as well as any directory below it. It can be placed in a specific directory and configured to give access to other directories outside of its location (centralized). SFM gives its user upload, create file, rename, delete, copy/move files, directory creation as well as directory navigation, it also includes an image viewer, text viewer and mime type downloading. It can be configured to "turn-off" scripts when uploading to increase security.
