

# Simple jQuery Tooltip by Allembu

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is a very basic tooltip using CSS and jQuery. The goal of this tooltip was to make something rich looking without all of the weightiness of most designer tooltips. The weight of this tooltip script comes within the CSS and only a few lines of jQuery to facilitate the opening and closing of the tooltip. Simple jQuery Tooltip does not use any images, only css to style the entire tooltip and is cross-browser compatible tested using Chrome, IE9 and Firefox.
