

Simple Log File Analyzer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Simple Log File Analyzer helps you to detect possible hack attempts within the log files of your webserver. Features - Error handling - Scan a log file for four different attack types - Display a short scan report - Write scan results to a new log file - Easy to use (everything is simple and automated)
