

# Simple PHP or Perl Live Counter For you Flash Movie

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This tutorial shows you how to create a simple counter that you can use anywhere in your flash movie. The most obvious place is for either the intro or the main part of the Flash Movie that you are working with. You can also use this in other parts of your movie as well. For example, say you needed to keep track of how many users are viewing a certain section of your website, you can add one line of code and one text file - and you'll be able to keep track of that section.
