Simple Posting System

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Simple Posting System (SPS) is a PHP program that can be used as a simple guestbook, a news system, etc. It does not require a database, and features configurable number of postings to be displayed per page, the 'next' and 'previous' navigation links, and more. Update: small security-hole fixed, code cleanup and style-sheets.
