Simple Search

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a simple script called Simple Search. To set this script up just enter a DSN at the top of the Default.asp page and the rest is cake. What this does is once you enter in the DSN, the script will list all tables and views in the database, select a table or view and you can then search on the fields contained in the database.
