

Simple visitor counter

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a simple text-based visitor counter. It uses the IIS PageCounter object and only shows the total (non-unique) number of hits. This is as easy as it gets: copy-paste 3 lines of code into your page and you're done.
