Simplewire ActiveX SMS Software Development Kit

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The ActiveX SMS SDK provides easy, high-level control of the Simplewire wireless text-messaging platform. Designed be to be as developer-friendly as possible by hiding the intricacies of the XML format required to communicate with the Simplewire WMP (Wireless Message Protocol) servers, The ActiveX SMS SDK makes it possible to send an SMS message off with as little as two lines of code. The 32-bit ActiveX SMS SDK is implemented as a COM object (DLL). As an ATL object, the ActiveX SMS SDK does not require the Microsoft Foundation Class DLLs to run. This allows your projects to require less memory, to run faster, and to have a reduced footprint. ASP applications will execute quickly, installation packages will be smaller, and less dependency issues will arise for your end-users.
