## **Simplified Search Engine Content**

Address Contact Person Mobile Number Email

{value\_address}
{value\_contact\_person}
{value\_mobile\_number}
{value\_email}

Simplified Search Engine content creates fully automated web sites that rank you higher for search terms. It features automatic content generation, automatic blog and ping, automatic trackback links, sitemap building, ip cloaking, and much more. Simply enter in a handful of main keywords, then let the software build your pages, get links, and find two more levels of keywords increasing your chances of finding a new niche market. Use this to build MFA Made for Adsense sites, or use the powerful ip based cloaking to redirect traffic to your other web sites and affiliate partners.
