Mobile Number	{value_mobile_number}
Email	{value_email}

The SLIPPER vertical slide-show applet supports up to 100 images, of the same or differing sizes. Images are individually linkable (url and target). Scrolling direction is selectable, and sound cues are supported on mouse clicks. Alignment modes position images left, right, or centered. Each image has its own border, with adjustable thickness and color. A secondary 'framing' border, also adjustable, may surround the moving images, giving a film-like effect. Link box color is selectable, and may be in outer or inner image borders. Strikingly versatile layout effects. Ready-to-run demos and detailed instructions are provided with the free download of this very small, fast applet. Works great as a left menu navigation tool, too.
