SmartWebby's Guide to Simple Dynamic HTML (DHTML)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This javascript scripts guide is especially for those who are trying their best to learn DHTML by dissecting code written by others and for people who don't know much about programming but are interested in making their web sites look Dynamic with simple add-ons. In short we bring you (clean) cut and paste resources with explanations on how they work on the same page of each resource.
