Email	{value_email}

Nobody would deny the great impact the social media has on promoting one's business, increasing website traffic, creating valuable backlinks, and getting referral customers. But rushing in the world of 1000+ social bookmarking sites alone is rather hasty – just imagine how much time you'll need to register with at least 15 most popular services and post links there at least once a day. With the Sociable extension this whole mess becomes easy and well-organized. Once having this Magento module configured, you get a perfect solution for bookmarking your products and store pages. The Sociable add-on allows your site visitors to share any page of your Magento store on any social networking site.
