Social Score PHP Class (Facebook, Google+, Twitter, Linkedin)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Here is a simple class that will return the Social Score of a website URL. You can also use this class to display the individual score, likes, +1's, tweets or shares from Facebook, Google+, Twitter and LinkedIn. The beauty of this class is that it uses all of the social networks' public API's so you do not need to have or obtain a single API key or developer account to use this class.
