SoftArtisans OfficeWriter delivers real Excel spreadsheets and Word documents over the Web without the need for Microsoft Office. Other Web reporting solutions may claim to support Microsoft Office formats, but OfficeWriter is the only product on the market that fully maintains all of Excel's and Word's formatting/styles and advanced features such as VBA, macros, pivot tables and charts. Powerful as a stand-alone Web-based solution • it generates over 100,000 reports per hour - it's also a perfect complement to your current business intelligence tool, delivering reports in the familiar formats your users want.
