MN8 is an experimental object oriented scripting language, tightly integrated with the net, which emulates the concepts at the core of XML in order to simplify and make as transparent as possible information extraction and manipulation from the WWW and XML documents. Written in Java works with most operating systems and allows easy reuse of the huge number of libraries available through simple wrappers. At this point MN8 has concepts for: HTML, HTML-Forms, Cookies, RSS, OPML, HTTP, FTP, POP3, SMTP, Jabber, BEEP, XML-RPC, SOAP, MBox.
