

Spambot Hider

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A very easy to use script that allows you to hide your email address from spambots; simply send the image a base64 encoded string of your email address, along with colour information, and the php script returns a decoded image. Looking at the source will also help you learn about the basics of image creation using PHP.
