

Spida - Advanced Robots Behaviour Magento Extension

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This HANKEME Extension allows to apply advanced Logic on the Index and Follow meta robots setting. To achieve a reasonable Search Engine Ranking it is very important to keep Google and Friends from indexing certain Pages, as for Example - non-aliased Catalog Pages (like catalog/category/view/id/6) - Cart and Checkout Pages - Pages with attached \$_GET-Parameters (like myproduct.html?someid=123 - some custom Pages you might not want to be indexed This Extension allows you to set meta-robots states as 'Index/Follow', 'Noindex/Follow' - for default Magento Pages (as Customer Account, Cart and more) - for some and all \$_GET-Parameters - on a per-URL-Basis It also allows you to set meta Titles on a per-URL-Basis. All Settings can be made per Store View The Advanced Robots Extension can also be downloaded from our Magento Extension Store
