<b>Email</b>	{value_email}

Spiderfish traverses websites and downloads all files it finds (e.g. gif, jpg, mp3, etc.). To search a particular webpage, put the webpage's URL into the Webpage textbox, set the Download Directory, and push the "Go" button. All files found by Spiderfish will be put into the download directory. SpiderFish v2.0 represents a significant step forward in our design and incorporates many new features.
