Splash Page Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A splash page is an interlude page that is shown temporarily before the intended target page, usually for the purpose of airing an important announcement or catchy advertisement. This script lets you quickly add a Splash Page to proceed any page on your site, just by calling an external JavaScript at the top of the target page. The splash page is dynamically rendered using a IFRAME tag and frequency controlled using cookies.
