

Split an array to many pages

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

It is a function that splits any array to many pages. Easy to configure number of maximum items per page. Very simple to use, then it writes both your array and a Page navigaton bar automatically. New version 1.2 supports result template, document title.
