

SQL QuickRegister

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

SQL QuickRegister is a full-featured password/membership management system with 4 modules: registration, login, re-direction and a web panel. Very easy to secure HTML Files using a PHP Wrapper or a CGI Redirect Script. Features include the creation of an expiry date upon registration, checking the expiry date upon login or via any page re-direct, administrative control of membership profile, ability to deny or allow access at any time, e-mail confirmations of registration, password recovery for members, denies access after a lapsed time period, disallows multiple logins, and all page links checked to prevent bookmarking. Other Modules include: 1. Broadcast e-mail to members and 2. Secure digital files for download. 3. Organize members into groups each with its own page after login and 4. Pay registration and renew with PayPal 5. Restrict access by IP Address and/or Computer and Browser 6. Use a Captcha Image upon registration to stop spam robots.
