Have your squirrelmail look like hivemail, yahoo, hotmail or even better. With 3 new XP Style templates and more to come. What you get is a fully working webmail client application with pre-installed plugins and many extras already included. We can also customize the webmail application to match your site. Some included plugins: pgp encryption, fuse your mail into one account with pop3 fetching, virus scanner, spam assissin, Email Preview Panel (like outlook express), Spell Checker, Calendar todo html wysiwyg editor html viewer plus tons more... A very simple "out of the box" installation. Upload and run. Anyone can do it. Can be used for your personal website or server wide for all your clients.
