

Store Locator - Squirrelcart Module

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Our store locator module lets your customers easily locate your store locations. - Search by distance from Zip Code - Search by state - Returns results sorted by approximate distance in miles from customer Zip Code Zip Code data used to determine distance is accurate, and contains over 40,000 US zip code locations. - Show store address information, with optional store hours and Google maps - Manage your locations using Squirrelcart's control panel - Customize instructions, page header, footer, and form labels via control panel - Design is fully customizable via templates and stylesheets - Valid XHTML 1.0 transitional markup, valid CSS 2.1 stylesheets - Works for US locations. For other countries, please contact us for a quote. This module is an add-on for Squirrelcart CMS Shopping Cart Software. The module requires Squirrelcart. It can be used as part of your Squirrelcart store along with other store components, or on it's own PHP page without other store components.
