

StoreApp: A Titanium Store Application Template

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

StoreApp is a complete iOS and Android store application template built using the Appcelerator Titanium Mobile framework. Use this template to quickly create an Android or iOS mobile store for your business or client and submit to Apple App Store or Google Play. Features - Includes ViewScrollr Pro Module - Localization Support - Android and iPhone support - Spotlight & Featured sections to showcase products - Product detail screens for in-depth descriptions (HTML formatting) - Product grouping for easy browsing by potential customers - A fully functional shopping cart - Code to integrate PayPal module. Included - Code to help send completed orders to your server - Add multiple info tab screens easily with the configuration file and some web pages - Customize payment success message in configuration file - Product options for each item in your store (size, color, etc...) - Modify item quantity in the cart edit screen. Documentation included!
