

Submit Once

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Do you ever receive multiple copies of a single form submission? Do your visitors click the submit button over and over, hoping it will hurry up the process? This script will solve the problem by preventing the visitor from submitting the form after the first submission. Basic field validation also included.
