

## Sumatra: CSS Editor

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

Sumatra CSS Editor can be used as part of your CMS or WYSIWYG editor. It's pretty easy to implement. Take a look at demo. The editor loads any well formed CSS file into a textarea or GUI editor. It includes a file browser, so you can easily locate and load a CSS file you need to edit.
