Super Mp3 Converter converts audio files between MP3, Wave, WMA (Windows Media Audio), Ogg, Vqf and AC3(VOB) formats. Its user-friendly interface supports both drag & drop and shell operation of Windows Explorer. Most work can be done automatically with a few mouse clicks. You can convert many files in batches regardless of their source formats and target formats. Super Mp3 Converter also supports playback of all the audio files with its built-in player. Super Mp3 Converter V5.0 now support audio volume normalization and encode with Windows Media Audio 9 (WMA), which offers sound quality that's 20 percent better than the already state-of-the-art Windows Media Audio 8.
