Swiftchart is a java software that produces dynamic charts to be used within web applications and web pages (Java applet or java application for JSP / Servlet integration). Swiftchart includes bar, line and stacked charts in 2D and 3D and has a wide range of parameters to generate highly individual charts. The Swiftchart software is less than 75 KB in size, works with all major web browsers (JDK 1.1 compatible) and is very easy to integrate. The swiftchart java software allows one to define legend position, text color, line types, 3D depth, markers and more.
