TD Form Mailer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Allow people visiting your site to send you or others email from a web-based form. You make the form in any HTML document and call tdformmailer.cgi using the FORM ACTION tag. You can control whether you want results mailed to you, or to provide your surfers a convenient way to mail others. Checks email syntax as well as provides a handy security setting to allow onsite use only or universal calling from any website.
