# TD's Detect/Redirect

| | |
|---|---|
| **Address** | {value_address} |
| **Contact Person** | {value_contact_person} |
| **Mobile Number** | {value_mobile_number} |
| **Email** | {value_email} |

This is a very simple detect and redirect script. This will make sure a surfer is coming from a specific URL and then redirect them to a sponsor or your signup page (or wherever you want) if they aren't. If they are blocking their HTTP_REFERER by using an anonymizer it will still prevent them from accessing your content page. Useful for content pages that you want to protect from outside linking.
