TDE ASP Website Editor is a script with Dreamweaver integration available that allows to create editable areas into your web pages that can be modified from a visual online interface, directly from the web browser. With this tool you can offer your clients the possibility of update their web pages directly without requiring advanced HTML skills and, at the same time, protecting the site structure and design. ASP scripts are required in order to edit and display the contents; however you can also apply this script on static HTML pages since there is an option that allows to load the contents with client-side scripts. No programming skills are required to install and use this tool.
