

# Telnet Factory for .NET

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Telnet Factory for .NET is a suite of easy to use client components for communications using the telnet protocol. Using the included components users can add telnet functionality to any .NET application. Perfect for running router configurations scripts, automating remote job execution or providing a web based telnet interface. Evaluation download available.
