

Template Extended CGI Form Mailer (TECForM)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

TECForM is a CGI script that allows the mailing of a completely template specified mail through an HTML mailform. TECForM allows you to specify within the form which fields of the form are mandatory and which are not. You can also specify regular expressions for fields and set error messages, etc.
