Template Monster XML import script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

With these script it's possible to create a database with all relevant template data (inluded in the XML code) and transfer the preview versions of templates (screenshots). After the database is created, another script is able to update the data and screenshots on a daily base.
