

# TemplatePower

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

TemplatePower is a fast, easy to use and powerful PHP4 template class. TemplatePower is a lot faster than FastTemplate. Main features are: nested dynamic block support, block/file include support, show/hide unassigned variables, save/use parsed template on/from disk, PHP-file include tag, global/local variable assign, multiple variable assign using an associative array, database/php-variable stored template support and a re-use tag for blocks (test state).
