

Templates - why and how to use them in PHP3

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial shows you how to create a template-based Web site using FastTemplate class by CDI. By using FastTemplate you can change the look of your entire web site in seconds, use abstract programming without HTML, and your Webpage designer does not need to take care of all that "fuzzy" code.](http://www.thewebmasters.net/php/>CDI)
